

## APPENDIX E: ARIA VALUES FOR 1996 STATISTICAL LOCAL AREAS

### Notes:

SLA values are the average of all 1 km grid-cells within the SLA. Grid-cells within a service centre (based on ABS Urban Centre boundaries) were given the values of that centre (see 7.4.2 and 7.6 above). However a SLA generally regarded as part of a town or city may have a different ARIA score from the larger centre if the SLA contains grid-cells from outside the Urban Centre boundary.

ARIA scores do not exist for the 7 SLAs that are off-shore and migratory areas. These SLAs do not have a physical area.

The ARIA scores published below contain several minor changes to the scores contained in the previously published version of this paper.

- The ARIA score for Kingsborough (M) – PtB (SLA No. 63811) has been revised. The new ARIA value now includes grid-cells for Bruny Island in the calculation of the average ARIA value for the SLA.
- ARIA scores for several SLAs in the ACT that lie wholly within the Urban Centre boundary have been revised to zero whereas they previously had a very small non-zero value.

### New South Wales
